

Jennings Randolph

the simple getaway

Jennings Randolph Lake, named after former West Virginia Senator Jennings Randolph, was originally designed to improve the water quality of the river downstream of the dam, reduce flood damage, provide a water supply for industries and municipalities downstream, and enhance recreational opportunities for the public. Now, after more than 30 years of operation, many of the engineering challenges of three decades ago are up and running and we can concentrate on some of the fun stuff. Already offering boating, fishing, camping, hiking, nature walks, cabins, whitewater rafting, swimming, 3-D archery, and more, we are constantly adding to and improving our recreation opportunities. Visit our website for more information and please sign our guest book. While you are there, tell us how you think we're doing.

Jennings Randolph

The Dam

Type Rolled Earth & Rockfill
Length 2,130 ft.
Height 296 ft.
Top Width 25 ft.

The Reservoir

Recreation/Water Supply Lake . . . 952 acres
Flood Control Lake 1,184 acres

The Spillway

Type Chute
Crest 210 ft.

The Outlet Works

Type Tunnel & Conduit
Tunnel Length 1,619 ft.
Tunnel Diameter 16' 4"

The Dike

Type Rolled Earth & Rockfill
Length 900 ft.
Height 90 ft.
